

UNITED STATES GOVERNMENT

# Memorandum

TO : C/GSD

DATE: 9 August 1965

FROM : DD/S&D

SUBJECT:

25X1A

The [redacted] people came in to demonstrate a dry film processing technique to AND which greatly relieved our problem of film processing in their PRF analysis work. I

25X1A  
25X1A

understand from [redacted] that they were told by [redacted] 25X1A [redacted] that a response sign of something like 2.5 nanoseconds was required. This kind of response time could not be achieved, of course, and I know of no circumstances under which such a response time would be required. I have checked with [redacted] 25X1A [redacted] and he concurs that they were given this kind of a number. I asked [redacted] to check on the real requirement here.
